

Anderson Island Health — Simple CMS Guide

This guide is for board members and staff who update website **words, numbers, board bios, and events**. You do not need to know code.

Before you start

You need

1. A **GitHub account** (github.com — free to create).
2. An **invitation** to the website repository from an AIHA admin (Write access).
3. A **bookmarked link** to the editor (see below).

Sign in

1. Open the editor link (staging or production — see next section).
2. Click to sign in with **GitHub**.
3. Approve access if GitHub asks.

If login fails, contact your site admin — they may need to add you as a collaborator or fix the login setup.

Two editors: test vs live

There are **two separate editors**. Always know which one you are using.

	Test site (staging)	Live site (production)
Editor link	test-aiha.netlify.app/admin/	andersonislandhealth.org/admin/
Public website	test-aiha.netlify.app	andersonislandhealth.org
When to use	Try changes here first	Only when you want the world to see the change

Rule: Practice on the **test** editor. When everything looks right, either use the **live** editor for the same change, or ask your developer to publish test changes to the live site.

Changes are **not automatic** between test and live — each editor saves to its own place.

How to edit and save

1. Open the editor and sign in.
2. Use the **left sidebar** to pick a section (Hero, Mission, Board, etc.).
3. Click the page or item you want to change.
4. Edit the fields on the **left** ("Edit" panel).
5. Check the **right** panel ("Preview") to see how it will look.
6. Click **Save** (top right).
7. Wait **1–2 minutes** for the website to rebuild.
8. Open the matching public site URL and **hard refresh**: - Mac: `Cmd + Shift + R` - Windows: `Ctrl + Shift + R`

If you don't see your change, wait another minute and refresh again.

What each sidebar section does

The sidebar follows the homepage from top to bottom.

Sidebar section	What you can change
Site settings	Browser tab title, search description, floating "Donate" / "Volunteer" button labels
Hero	Top banner headline, tagline, and buttons
Mission	"Our Mission" two-column text and donate button
Phase 1 plans	Plans intro, bullet pills, timeline cards, van image path
Donate & giving	Giving section copy, impact bullets, buttons, Zeffy sidebar text
Donate & giving → Fundraising numbers	Goal amount, current amount, "last updated" label (thermometers on site)
Board	Board section headings; each member's name, role, and biography
FAQs	FAQ section intro and each question/answer card
Events	Events section intro; each event (title, date, location, description)
Contact, footer & legal	Contact cards, footer text, volunteer popup, tax disclosure

Not in the CMS (ask a developer): menu layout, colors, fonts, adding new page sections, uploading brand-new photo files to the server.

Formatting text (Bold, links, images)

Many fields show a small toolbar like a word processor:

Button	What it does
B	Bold
I	Italic
Link	Turn selected text into a clickable link
Image	Insert a photo

How to format

1. **Highlight** the words you want to change.
2. Click **B**, **I**, or the link button.
3. For links, paste the URL when asked (e.g. `mailto:info@andersonislandhealth.org` or `#board` for on-page links).

Keyboard shortcuts: `Cmd+B` / `Ctrl+B` (bold), `Cmd+I` / `Ctrl+I` (italic).

Adding a photo in text

1. Place your cursor where you want the image.
2. Press **Enter twice** (blank line) so the image sits **below** the paragraph, not inline with the sentence.
3. Click the **image** button and choose a file from the **assets** library (photos, icons, logos).
4. Save.

If a photo shows as a text path instead of an image on the site, contact your developer — the site may need an update.

Common tasks

Update a board member bio

1. Sidebar → **Board** → **Board members**.
2. Find the person (or click **Add Member**).
3. Fill in **Name** and **Role**.

4. **Biography:** leave **empty** until the bio is ready. Empty bios = no expand arrow on the website.
5. Save.

Members appear **alphabetically by name** on the live site.

Add or edit an event

1. Sidebar → **Events** → **Event listings**.
2. Add or open an event.
3. **Date** is required (YYYY-MM-DD , e.g. 2026-04-29). The site shows it as a full date (e.g. **April 29, 2026**). Future dates appear under **Upcoming**; past dates move to **Past events**.
4. Save.

Update fundraising numbers

1. Sidebar → **Donate & giving** → **Fundraising numbers**.
2. Update **Goal (\$)** and **Current amount (\$)**.
3. Update **Last updated label** (e.g. March 15, 2026).
4. Save.

The Zeffy donation form may show its own live total; keep these numbers in sync with what you announce publicly.

Change homepage headline or mission text

1. Sidebar → **Hero** or **Mission**.
2. Edit the fields. Use **+ Add Paragraph** under Mission left column for extra paragraphs.
3. Save and check the test site first.

Important rules

- **One person at a time** per section if possible. If two people save the same page, the last save wins.
 - **Don't edit the same content in GitHub** while someone is using this editor.
 - **Always Save** before closing the tab.
 - **Use History** (clock icon on the right) to see or restore earlier versions if you make a mistake.
 - **Bookmark** the correct editor link so you don't accidentally edit the live site when you meant to test.
-

Something wrong?

Problem	Try this
Can't log in	Confirm you accepted the GitHub invite; try a private/incognito window
Save button fails	You may not have permission — ask an admin to confirm your GitHub access
Change not visible	Wait 2 minutes; hard refresh (<code>Cmd+Shift+R</code> / <code>Ctrl+Shift+R</code>)
Edited test site but live site unchanged	Expected — test and live are separate; repeat the edit on live or ask developer to publish
Edited live but test site unchanged	Expected — same reason
Empty fields in editor but text on website	Rare sync issue — contact developer
Board member has no expand arrow	Biography field is empty (intentional until bio is ready)

Quick checklist for every edit

- [] Opened the **correct** editor (test vs live)
- [] Signed in with GitHub
- [] Made edits and clicked **Save**
- [] Waited 1–2 minutes
- [] Hard-refreshed the matching public website
- [] Confirmed the change looks right

Need help?

- **Technical / login / publishing to live site:** contact your AIHA website developer.
- **Who can get access:** an org admin adds collaborators at GitHub → repository **Settings** → **Collaborators**.

Last updated for the Anderson Island Healthcare Advocates website content editor (Sveltia CMS).
